# What's the difference between OneNote and OneNote 2016

Applies To: OneNote 2016, OneNote

OneNote 2016 (as well as OneNote 2010 and 2013) comes with the Office suite and is available as a free download from www.onenote.com. However, you might have noticed another version of OneNote on your Windows 10 device that's simply called "OneNote." This new app, built from the ground-up, works great with any PC, tablet, or smartphone running Windows 10.
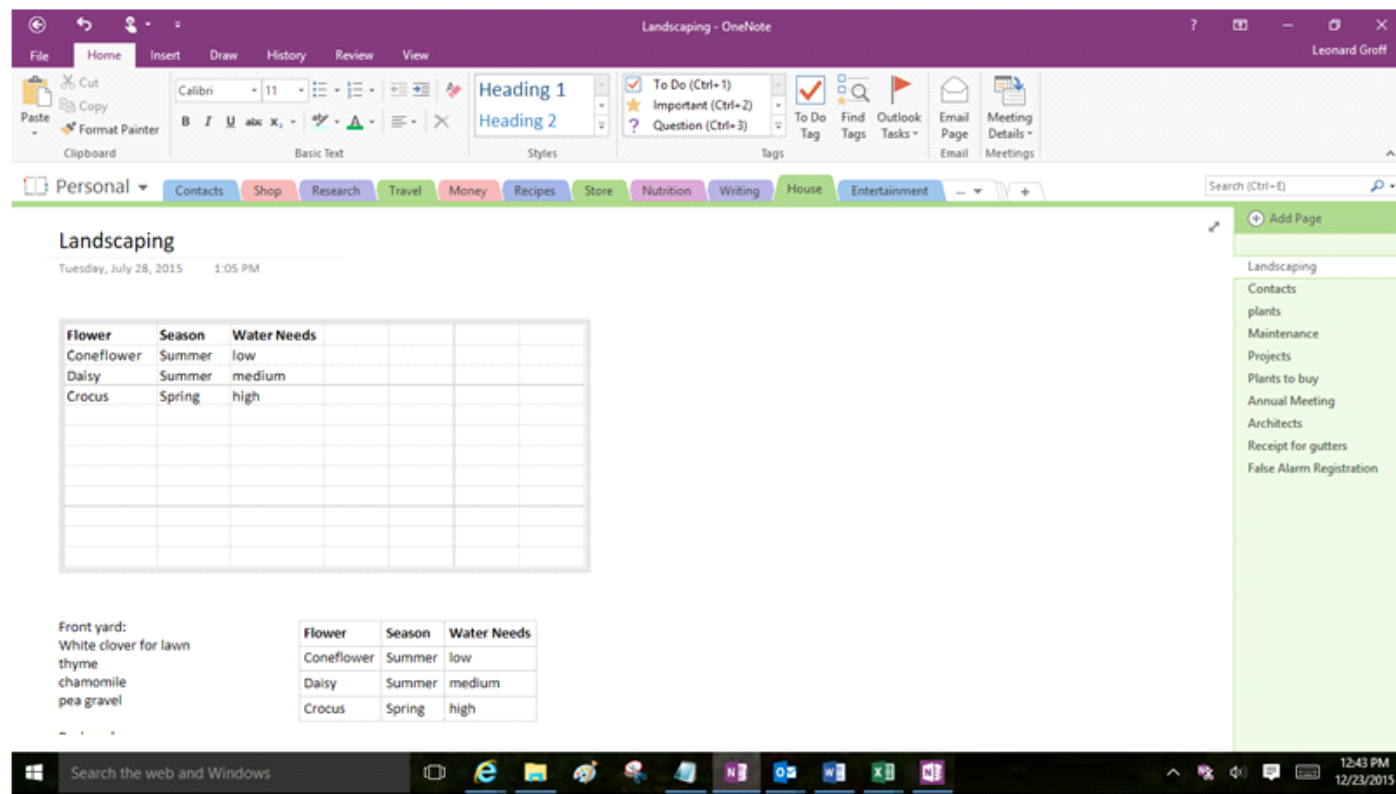

https://support.office.com/en-us/article/What-s-the-difference-between-OneNote-and-OneNote-2016-a624e692-b78b-4c09-b07f-46181958118f
27/09/2016 5:20 PM - Screen Clipping

OneNote for Windows 10
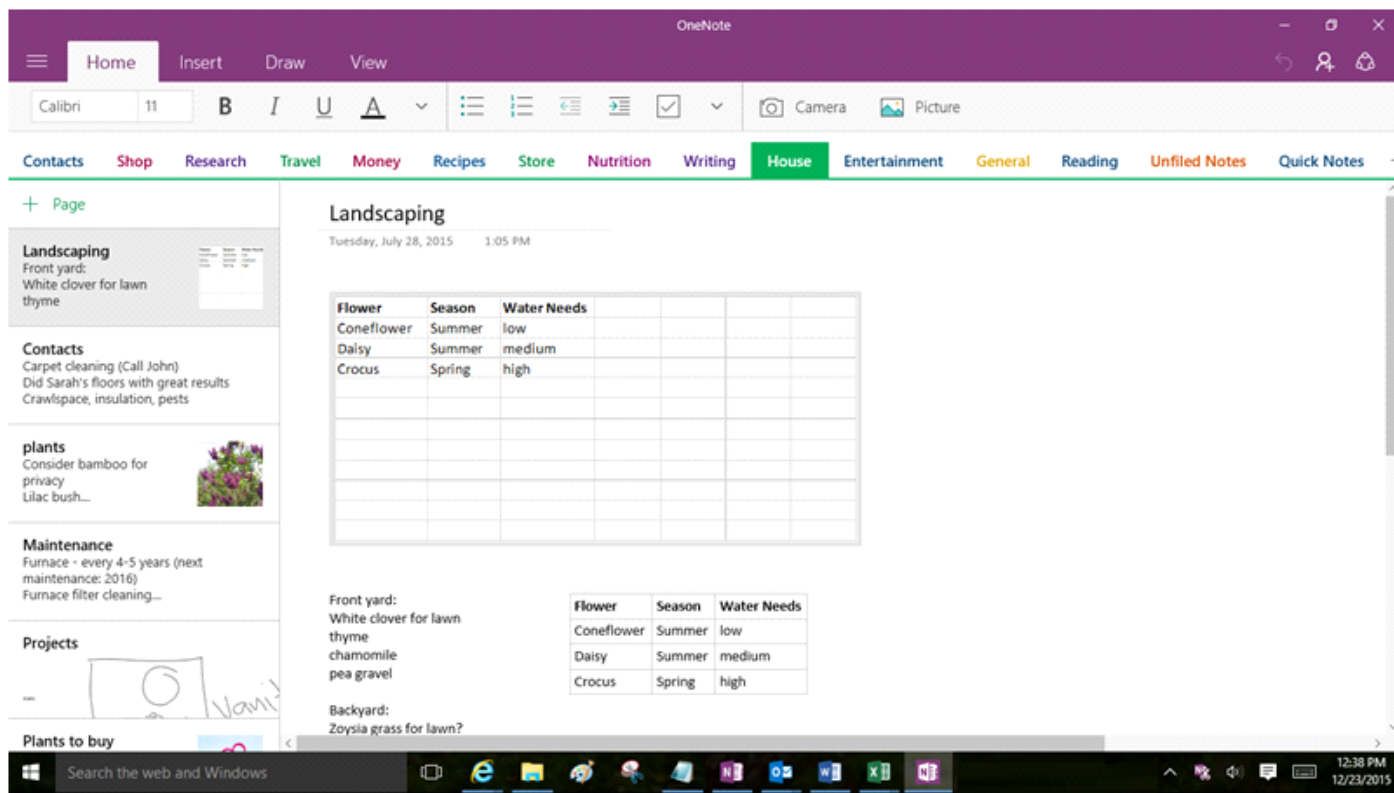

OneNote 2016

Available only in OneNote 2016

While OneNote is great for all users, you might need to use OneNote 2016 if you rely on any of these features:

- Capture a screen clipping (Win+Shift+S) and add it to your notes or the clipboard

- Print anything on your computer directly to OneNote

- Office suite integration, including:

  - Insert meeting details from Outlook into your notes

  - Insert an embedded Excel spreadsheet into your notes

  - Create tasks in OneNote and have them appear in Outlook

- Convert handwriting into text

- Take notes during a recording and have OneNote will highlight what you were writing when you play back the recording later

- Use the equation editor to add complex equations to your notes

- Insert basic shapes from the Draw menu

- Categorize notes with custom tags and quickly find them later

- Apply a template to pages to maintain a specific look or layout

- Store notebooks on your local hard drive instead of in the cloud

- Save or back up your notes on a local hard drive instead of in the cloud
